Focus group primary questions and prompts

Primary question	Why would someone be willing to share data?
Prompts during discussions	What are the benefits from sharing data?
	Who will benefit from sharing data? How will these people benefit from data sharing?
	Are benefits predominantly from a research perspective, clinical perspective, or both?
	Do you think that population level data is of interest to healthcare consumers? If so, how?
	Are there any other reasons why people would be willing to provide health data?
Primary question	Why would someone be hesitant to share data?
Prompts during discussions	What are the risks of sharing data?
	Who may be disadvantaged from sharing data? How may these people be disadvantaged?
	Who should have access to the data that you share?
	Would you be willing to share data with organisations external to the health network? What organisations would be acceptable? What would need to be considered under such circumstances?
	Are there any other reasons why people would be hesitant to provide health data?
